
Hair Texture and Applications

Q: What styles is the human hair available in?

Our human hair extensions are available in curly, wavy and straight. They are packaged according to length and a total weight of 4oz. Note: Pre-tipped hair is packaged in groups of 25 strands and weigh 1oz. Thickness can vary. This human hair can be coloured and permed. Virgin human hair comes in dark and light brown only. Remy human hair comes in 35 colours.

Q: What type of human hair extensions should I do?

There are many different ways to attach human hair extensions to your existing hair. Please consult with a qualified professional stylist before choosing a method that suits your lifestyle and your budget.

Hair Weaving

Weaving tracks are created on the individual's head using thread and the human hair extensions are then sewn on. This popular method uses hand tied or machine wefted human hair and typically lasts 3-6 months before being removed or re-done. We recommend using hand tied wefts for the most natural look. Wefts are pre-cut for your convenience (do not cut the hand-tied wefts).

Hair Fusions

This process is also called strand-by-strand extensions. Each extension is attached by melting an adhesive tip and fusing it directly to your hair. A qualified hair stylist can cut and blend the extensions into your own style, creating a very natural effect. This popular method uses pre-tipped human hair and typically lasts 3-4 months before being removed or re-done.

Hair Bonding

A special glue is applied to the weft before the extensions are bonded close to the roots your hair. This method is a simple and quick extension method using skin weft hair and can be easily removed. Please note this is just a temporary method and is not designed to last more than 3 months.

Clip On Human Hair Extensions

Clip on human hair extensions are available in a variety of colours, lengths and styles with clips sewn to the edge of the wefts. They are a quick, affordable way to add length and fullness to your hair. It only takes a few moments to clip them to your own hair, making them a convenient choice for many clients. Clip on human hair extensions can be put in and removed whenever you like. With proper care and regular servicing, they can last for years.

Skin Wefts

With reusable wefts, this temporary or extended human hair extension method is a convenient option. Using a special adhesive strip, the hair is applied to the root of your hair which has been parted using a 'brick layer' method.
